£325 / €350 / $450 / CAD $515
All styles in the collection are provided with the “intelligent” soft protectors by D3O Lab.

D3O™ is a patented protective material that combines enhanced chemistry with product engineering to produce high performance shock absorption and impact protection solutions. The material contains intelligent molecules that flow freely when moving but on shock lock together to absorb impact energy and spread the force, instantly returning to their flexible state. This characteristic makes the protectors flexible, comfortable, yet offering total protection. D3O™ components integrate perfectly into garments, so that neither the style nor the function are compromised. Their light weight is such that their presence inside the garment is almost unperceived.

In the new collection for 2016, limb protectors will be either type T5 EVO PRO, certified at Level 2 in ambient, wet and cold, and Level 1 in hot conditions at 40°C; or type T5 EVO Level 1, on lighter jackets.
**D3O® VIPER PRO BACK PROTECTOR**

D3O® unique patented technology provides both enhanced protection and a versatile, flexible material for a host of shock absorption and impact protection applications.

Delivering the most flexible and discreet protection on the market, it consistently outperforms traditional foam-based materials.

Benefiting from Airwave Technology, the D3O® Viper Pro Back Protector is extremely flexible, low profile and lightweight, whilst offering incredible protection.

The D3O® Viper Pro Back Protector is CE certified and features:

- D3O® patented technology
- Certified to exceed the performance requirements of EN1621-2:2014, Level 2
- Breathability and flexibility
- Airwave Technology for improved airflow
- Ergonomic design for comfort and protection
- Full back protector offering maximum coverage
- Thickness: 18mm
- Available in 5 different sizes, determined by torso length (cm)

**POTENTIAL INTEGRATION VIEW**

**FLEXIBLE ERGONOMIC DESIGN**

**TAPELED EDGES FOR BETTER INTEGRATION**

**PIECE INTEGRATED INSIDE JACKET**

**IMPROVED HOLE LAYOUT FOR SUPERIOR BREATHABILITY**

D30® Viper Stealth Back Protector - Tested to EN1621-2
Lower value = better protection
**D3O® LP1**

D3O uses patented, patent-pending and proprietary technologies to make rate-sensitive, soft, flexible materials with high shock absorbing properties.

The D3O® LP1 is the most advanced breathable limb protector range engineered by the experts in impact protection at D3O.

Utilising a new tri-ventilation technology, the D3O® LP1 delivers a 45% improvement in breathability while maintaining superior high-performance, soft and flexible D3O® impact protection properties.

High levels of humidity are strongly linked to rider discomfort. The enhanced ventilation featured in the D3O® LP1 increases air passage and moisture flow from the body through the pad to maximise comfort in warm conditions, without sacrificing performance.

**PRODUCT FEATURES**

- Tri-ventilation for superior breathability
- CE certified to EN 1621-1:2012, Level 1, including optional cold and hot conditions
- Type A coverage
- Manufactured in a highly durable material
- Temperature stable

**TRI-VENTILATION TECHNOLOGY FOR SUPERIOR BREATHABILITY**

D30® T5 EVO PRO X RANGE

D30® unique patented technology provides both enhanced protection and a versatile, flexible material for a host of shock absorption and impact protection applications.

The D30® T5 EVO Pro X Range utilises the latest material innovation from D30 which offers increased durability.

The D30® EVO Pro X parts offer greater impact protection than the D30® EVO X range and Area B coverage. They are CE certified to level 2 across ambient, wet and cold conditions.

- Manufactured in a highly durable material
- CE certified to EN1621-1:2012
- Level 2 in ambient, wet and cold conditions
- Area B coverage
- Temperature stable
- Non-toxic
